

POLITANGLE SCHOOL

Teach political thinking. Without telling students what to think.

THE SCHOOL-READY TEACHER HANDBOOK

Junior 10-13 / Youth 14-18

Eight guided lessons / Printable tools / Question banks

CANDIDATE v3 · CONTROLLED PILOT

START HERE

Your route through the pack

Designed for preparation at a glance and confident use during a live lesson.

01	Start safely Purpose, privacy promise and activity choice	3-5
02	Teach Eight complete lesson plans	7-14
03	Facilitate Neutrality, safeguarding and result language	16-18
04	Print Four reusable classroom tools	20-23
05	Reference Junior 16 and Youth Full 42 question banks	25-39
06	Validate Pilot evidence and teacher checklist	41-42

01 Start safely

Set the room before the first response arrives. Make the privacy promise explicit, choose the correct age band and separate political preferences from knowledge questions.

Use the section tabs and page numbers to jump directly to the classroom material you need.

FIVE-MINUTE BRIEF

A safe room for difficult ideas

Politangle helps students identify the values, concepts and trade-offs beneath disagreement. It does not assign students to parties or expose individual answers to teachers.

PRIVACY**Make the promise**

"I can see how the room answers, never who gave an answer."

PARTICIPATION**Allow uncertainty**

"Unsure" and "it depends" are valid starting points. Ask what information is missing.

ASSESSMENT**Separate preference from knowledge**

BELIEVE has no correct political answer. CLASSIFY and UNDERSTAND do.

NEUTRALITY**Discuss reasons, not identities**

Invite the strongest fair reason on both sides. Never ask who selected an answer.

CONTROLLED PILOT ONLY

Junior and Youth wording remains candidate content. Real-school use requires cognitive testing with intended students and qualified legal/privacy review.

CHOOSE THE ROUTE

One classroom, two age bands

JUNIOR Ages 10-13	YOUTH Ages 14-18	TEACHER OVERRIDE Use professional judgement
-----------------------------	----------------------------	---

JUNIOR 16	YOUTH QUICK 26	YOUTH FULL 42
Concrete perspective prompts. Best for a first structured political discussion and social-media literacy. Not a diagnostic profile.	A broad classroom map with manageable completion time. Suitable for one lesson.	All constructs across THINK, FEEL and ACT. Best across two lessons or a longer session.
Use with: Who is trying to influence me? Power, fairness and disagreement	Use with: Where does our room stand? Youth Quick classroom lab	Use with: Think, Feel, Act Youth Full profile lab

Boundary rule: age is a guide, not a diagnosis. A teacher may choose the Junior form for an older class that benefits from simpler language. Do not use the Youth form with younger students merely to produce a more detailed report.

02 Teach

Eight complete routes from anonymous response to reasoned discussion. Every lesson includes preparation, a timed run, neutral prompts and a private close.

Use the section tabs and page numbers to jump directly to the classroom material you need.

READY-TO-RUN LESSON

Who is trying to influence me?

AGE 10-13	TIME 45 min	FORMAT Anonymous + discussion
---------------------	-----------------------	---

LEARNING PURPOSE Recognise emotional political messaging; separate claim, evidence, emotion and scapegoating; pause before sharing.

RUN OF LESSON

0-8	TEACHER Show two fictional social posts. Model noticing reaction words.	STUDENTS Circle words designed to trigger a fast feeling.
8-22	TEACHER Run J10, J16 and selected literacy questions anonymously.	STUDENTS Answer privately; watch how the distribution develops.
22-35	TEACHER Sort the posts into claim, evidence, emotion and target.	STUDENTS Use the Message Microscope worksheet.
35-45	TEACHER Model pause-check-compare, then invite a fair rewrite.	STUDENTS Rewrite one manipulative post without removing its claim.

ASK THE ROOM

- Can an emotional message still be true?
- Why is blaming one group attractive?
- What makes a source trustworthy?

BEFORE YOU START

Prepare two fictional posts about a low-stakes school issue. Never use a student's real post.

INCLUSION + SAFETY

Use delayed projector reveal. Allow students to analyse without speaking. Stop personal targeting immediately.

PRIVATE CLOSE Ask students to record one idea they now see as more complicated. Never ask them to reveal their anonymous answer.

READY-TO-RUN LESSON

Power, fairness and disagreement

AGE 10-13	TIME 45 min	FORMAT Anonymous + discussion
---------------------	-----------------------	---

LEARNING PURPOSE	Connect elections with limits on power; compare freedom, safety and fairness; explain opposing reasons fairly.
-------------------------	--

RUN OF LESSON

0-8	TEACHER Explain anonymity and the response scale with a neutral example.	STUDENTS Practise using between/depends and unsure.
8-25	TEACHER Run six Junior questions; pause on two split distributions.	STUDENTS Answer privately and notice disagreement without guessing who chose what.
25-37	TEACHER Set a fictional student-council power problem.	STUDENTS Design one fair limit and explain what it protects.
37-45	TEACHER Invite two strong reasons, then close privately.	STUDENTS Write one opposing reason you can now explain fairly.

ASK THE ROOM

- When can safety justify limiting freedom?
- Why might a majority still need rules?
- Is equal treatment always fair?

BEFORE YOU START

Choose six prompts across power, fairness and freedom. Prepare a fictional school-council scenario.

INCLUSION + SAFETY

Avoid asking students to disclose family or religious beliefs. Offer writing instead of speaking.

PRIVATE CLOSE Ask students to record one idea they now see as more complicated. Never ask them to reveal their anonymous answer.

READY-TO-RUN LESSON

Where does our room stand?

AGE 14-18	TIME 45 min	FORMAT Anonymous + discussion
---------------------	-----------------------	---

LEARNING PURPOSE	Experience anonymous disagreement; identify competing values; distinguish a distribution from a group identity.
-------------------------	---

RUN OF LESSON

0-6	TEACHER Explain the privacy promise and the scale.	STUDENTS Join anonymously and test one neutral practice item.
6-25	TEACHER Run seven cross-construct questions.	STUDENTS Answer privately; note one surprising distribution.
25-38	TEACHER Invite reasons without party labels or personal disclosure.	STUDENTS Steelman one side before offering a challenge.
38-45	TEACHER Model cautious result language.	STUDENTS Complete the private exit ticket.

ASK THE ROOM

- What value is each side protecting?
- What fact could change an answer?
- Does a 50/50 room mean “centrist”?

BEFORE YOU START

Select seven questions spanning at least five constructs. Choose delayed reveal for sensitive topics.

INCLUSION + SAFETY

Do not label the class. A bimodal room can produce a misleading average.

PRIVATE CLOSE Ask students to record one idea they now see as more complicated. Never ask them to reveal their anonymous answer.

READY-TO-RUN LESSON

Political families without stereotypes

AGE 14-18	TIME 60 min	FORMAT Anonymous + discussion
---------------------	-----------------------	---

LEARNING PURPOSE Distinguish five broad families; separate cross-cutting tendencies; correct common misconceptions.

RUN OF LESSON

0-10	TEACHER Introduce families as traditions, not personality types.	STUDENTS Write one assumption you want to test.
10-32	TEACHER Run CLASSIFY items and reveal explanations.	STUDENTS Answer, check and revise the concept map.
32-50	TEACHER Run UNDERSTAND misconception items.	STUDENTS Explain why the tempting answer is incomplete.
50-60	TEACHER Model a corrected claim and invite one student rewrite.	STUDENTS Rewrite one misconception in your own words.

ASK THE ROOM

- Why is public healthcare not automatically socialism?
- Can nationalism join different economic views?
- Which differences concern ownership?

BEFORE YOU START

Prepare the five-family reference and identify the literacy items you will run.

INCLUSION + SAFETY

Correct concept errors without correcting political preferences. Avoid party shortcuts.

PRIVATE CLOSE Ask students to record one idea they now see as more complicated. Never ask them to reveal their anonymous answer.

READY-TO-RUN LESSON

Think, Feel, Act

AGE 14-18	TIME 60 min	FORMAT Anonymous + discussion
---------------------	-----------------------	---

LEARNING PURPOSE	Distinguish judgement, emotional reaction and intended choice; treat tension as context rather than hypocrisy.
-------------------------	--

RUN OF LESSON

0-10	TEACHER Explain the three modes using a non-political example.	STUDENTS Create a neutral think/feel/act example.
10-37	TEACHER Run four complete construct triplets.	STUDENTS Answer privately and compare aggregate modes.
37-52	TEACHER Discuss the largest class-level tensions.	STUDENTS Suggest context that could explain the gap.
52-60	TEACHER Restate that ACT is intention, not observed behaviour.	STUDENTS Write one careful sentence about the result.

ASK THE ROOM

- When can principle and choice differ?
- Which mode depends most on context?
- What would count as evidence of hypocrisy?

BEFORE YOU START

Choose four construct triplets with suitable sensitivity for the class.

INCLUSION + SAFETY

Never diagnose an individual or call the class inconsistent. Keep explanations contextual.

PRIVATE CLOSE Ask students to record one idea they now see as more complicated. Never ask them to reveal their anonymous answer.

READY-TO-RUN LESSON

Youth Quick 26 classroom lab

AGE 14-18	TIME 60-75 min	FORMAT Anonymous + discussion
---------------------	--------------------------	---

LEARNING PURPOSE	Explore a multidimensional landscape; read distributions; locate consensus and division without forcing a label.
-------------------------	--

RUN OF LESSON

0-8	TEACHER Explain privacy, scale and result limits.	STUDENTS Join and answer a neutral practice item.
8-48	TEACHER Run Youth Quick 26 student-paced.	STUDENTS Complete privately; use unsure when needed.
48-63	TEACHER Review map, compatibility and key distributions.	STUDENTS Identify one consensus and one divided item.
63-75	TEACHER Discuss cautious interpretations.	STUDENTS Write one result sentence that avoids a label.

ASK THE ROOM

- Where does an average hide a split?
- Which dimensions appear independent?
- Why can several families fit?

BEFORE YOU START

Allow sufficient device time. Decide which results are appropriate to project.

INCLUSION + SAFETY

Provide a non-digital alternative. Do not rank classes or present compatibility as identity.

PRIVATE CLOSE Ask students to record one idea they now see as more complicated. Never ask them to reveal their anonymous answer.

READY-TO-RUN LESSON

Youth Full 42 profile lab

AGE 14-18	TIME 2 x 45 min	FORMAT Anonymous + discussion
---------------------	---------------------------	---

LEARNING PURPOSE Complete all 14 constructs across THINK, FEEL and ACT and use aggregate tension as a discussion tool.

RUN OF LESSON

Lesson 1	TEACHER Run privacy brief and Youth Quick 26.	STUDENTS Complete the first section and note questions.
Between	TEACHER Keep the same anonymous room; do not export individual data.	STUDENTS Do not share the temporary participant token.
Lesson 2	TEACHER Run the remaining 16, then compare modes.	STUDENTS Complete the form and inspect aggregate patterns.
Close	TEACHER Discuss overlap without assigning a class label.	STUDENTS Write one limitation of the class result.

ASK THE ROOM

- What changed across THINK, FEEL and ACT?
- Which results need more context?
- What does compatibility not prove?

BEFORE YOU START

Plan two sessions and preserve the room securely between them.

INCLUSION + SAFETY

Check attendance changes before comparing totals.
Avoid claiming a longitudinal individual profile.

PRIVATE CLOSE Ask students to record one idea they now see as more complicated. Never ask them to reveal their anonymous answer.

READY-TO-RUN LESSON

Democracy, pluralism and populism

AGE
14-18

TIME
45-60 min

FORMAT
Anonymous + discussion

LEARNING PURPOSE Separate elections from liberal-democratic checks; distinguish populism from authoritarianism.

RUN OF LESSON

0-10	TEACHER Define elections, checks, pluralism and populism separately.	STUDENTS Create a four-box concept map.
10-29	TEACHER Run pluralism and populism triplets.	STUDENTS Answer privately; compare constructs.
29-44	TEACHER Run literacy questions and reveal explanations.	STUDENTS Correct the concept map with evidence.
44-60	TEACHER Optional structured controversy and private close.	STUDENTS Argue a position assigned at random, then reflect privately.

ASK THE ROOM

- Can populists support strong checks?
- Can authority preference exist without populism?
- Why can unelected institutions be both safeguard and tension?

BEFORE YOU START

Use fictional institutions rather than current personalities for the first example.

INCLUSION + SAFETY

Intervene against group targeting. Distinguish anti-elite language from evidence of authoritarianism.

PRIVATE CLOSE Ask students to record one idea they now see as more complicated. Never ask them to reveal their anonymous answer.

03 Facilitate

Neutral teaching is active work. The teacher protects a fair process, corrects conceptual errors and refuses to turn aggregate patterns into identities.

Use the section tabs and page numbers to jump directly to the classroom material you need.

FACILITATION GUIDE

Neutrality is an active practice

Students should be able to recognise the strongest fair version of a view without being pushed toward it.

BALANCE

State the strongest fair reason on both sides; do not create a weak “straw person”.

LANGUAGE

Do not praise movement toward a pole or describe the majority as politically correct.

EVIDENCE

Correct factual or conceptual errors while leaving political preferences open.

UNCERTAINTY

Treat unsure and depends as information: ask what condition matters.

BOUNDARY

Stop personal targeting while continuing to examine the underlying claim.

CAUTION

Never infer extremism from one answer or from ordinary conservative, socialist, patriotic or welfare-state preferences.

FACILITATION GUIDE

The classroom privacy promise

Aggregate-only design reduces risk but does not remove safeguarding or legal duties.

BEFORE

Use temporary codes; keep the teacher key private; explain projector behaviour.

DURING

Never ask students to identify their anonymous choice. Offer an alternative participation route.

PROJECTOR

Use delayed reveal for sensitive items; do not display tiny subgroups.

AFTER

Close the room and follow the school-approved retention or deletion process.

TEACHER SEES

Joined count, response totals, distributions and aggregate summaries.

TEACHER DOES NOT SEE

Roster, person-to-answer mapping, individual profile, family result or literacy score.

FACILITATION GUIDE

How to read the room

Use distributions to open questions, not close them.

DISTRIBUTION

Two opposing clusters can produce a misleading middle average.

COVERAGE

Do not interpret family or axis results when too little relevant content was answered.

COMPATIBILITY

Several families can fit at once. Compatibility is not identity or vote prediction.

MODE TENSION

THINK/FEEL/ACT differences are conversation signals, not proof of hypocrisy.

LITERACY

Accuracy can guide re-teaching because these items have evidence-backed answers.

REPORT

Prefer “suggests”, “was divided on” and “may need another explanation”.

04 Print

Four practical tools designed to be photocopied, written on and used without exposing a student's political position.

Use the section tabs and page numbers to jump directly to the classroom material you need.

PRINTABLE CLASSROOM TOOL

Message microscope

Analyse a fictional or teacher-approved social post before deciding whether you agree.

CLAIM	What does the message say happened or should happen?
EVIDENCE	What proof is offered? What proof is missing?
EMOTION	Which words try to create fear, anger, pride or hope?
TARGET	Who is blamed, praised or called “the real people”?
CHECK	Which second source could confirm or challenge the message?

PRINTABLE CLASSROOM TOOL

Fair disagreement canvas

Work alone first. Compare reasons without revealing anyone's anonymous vote.

SIDE A PROTECTS	Name the strongest value or concern behind the first position.
SIDE B PROTECTS	Name the strongest value or concern behind the second position.
FACTS WE NEED	What information would help us judge the trade-off?
POSSIBLE COSTS	What could each side lose if its preferred choice wins?
COULD CHANGE A VIEW	Write one reasonable condition, not a personal attack.

PRINTABLE CLASSROOM TOOL

Teacher room plan

Complete before opening a classroom. Keep the teacher key private and never collect student names.

PURPOSE	What should students understand by the end?
ACTIVITY + AGE	Junior 10-13 / Youth 14-18 / literacy / guided / custom
SAFEGUARD	Sensitive topic, alternative participation route and escalation contact
PROJECTOR	Live or delayed reveal? Why is this appropriate?
CLOSE	How will students reflect privately and how will the room be closed?

PRINTABLE CLASSROOM TOOL

Private exit ticket

Students keep this sheet. Do not collect it unless the school has explicitly approved that process.

I UNDERSTAND	One concept, value or reason I understand better.
I STILL WONDER	One question that needs another explanation or source.
I CAN EXPLAIN	One view, not necessarily my own, I can now explain fairly.
MY NEXT CHECK	What will I verify before sharing or acting on a political claim?
PRIVATE NOTE	Something I want to think about without discussing publicly.

05 Reference

Candidate question wording for teacher review. Each item is presented at readable print size with equal visual weight for both directions.

Use the section tabs and page numbers to jump directly to the classroom material you need.

JUNIOR QUESTION BANK

Junior 16 / items 1-4

Candidate v2. Classroom discussion instrument; not an individual diagnostic profile.

J01	PERSPECTIVE
A Government should make sure every family can use schools and doctors.	B Families should make more of their own choices, with less government help.
J02	PERSPECTIVE
A Taxes should help make the gap between rich and poor smaller.	B People should keep more of what they earn, even if the gap stays large.
J03	PERSPECTIVE
A Workers or the public should own more of the biggest businesses.	B The biggest businesses should mostly belong to private owners.
J04	PERSPECTIVE
A Public rules should change when most people's views change.	B Old rules should change slowly, after people have agreed for a long time.

JUNIOR QUESTION BANK

Junior 16 / items 5-8

Candidate v2. Classroom discussion instrument; not an individual diagnostic profile.

J05	PERSPECTIVE
A Adults should be free to make private choices if nobody is harmed.	B Some private choices may be limited to protect values shared by many people.
J06	PERSPECTIVE
A Leaders should limit freedom only when there is a clear, serious danger.	B Leaders may limit some freedom early to stop serious trouble.
J07	PERSPECTIVE
A Courts, laws, other parties and news organisations should check elected leaders.	B Election winners should have wide freedom to do what voters chose.
J08	PERSPECTIVE
A Countries should follow shared rules for problems that cross borders.	B Each country should keep the final say, even if shared problems are harder to solve.

JUNIOR QUESTION BANK

Junior 16 / items 9-12

Candidate v2. Classroom discussion instrument; not an individual diagnostic profile.

J09	PERSPECTIVE
A Someone who becomes a citizen belongs just as fully as someone born a citizen.	B Being born a citizen should count more when deciding who fully belongs.
J10	PERSPECTIVE
A Politics usually has many groups with different needs and ideas.	B Politics is often ordinary people against a powerful group that ignores them.
J11	PERSPECTIVE
A Protecting nature should sometimes come before growing the economy.	B Growing the economy should usually come first while we also protect nature.
J12	PERSPECTIVE
A Religion should not be used to make laws for people who do not share it.	B Religion can be a fair reason for laws, even when not everyone shares it.

JUNIOR QUESTION BANK

Junior 16 / items 13-16

Candidate v2. Classroom discussion instrument; not an individual diagnostic profile.

J13	PERSPECTIVE
A National government should run key services so everyone gets the same standard.	B Local communities should run key services whenever they can.
J14	PERSPECTIVE
A In a crisis, I worry more that leaders will get too much power.	B In a crisis, I worry more that leaders will lack the power to keep people safe.
J15	PERSPECTIVE
A I worry more when elected leaders weaken courts, laws or independent news.	B I worry more when courts or other bodies keep blocking elected leaders.
J16	PERSPECTIVE
A When politics goes badly, I first think people face hard choices and want different things.	B When politics goes badly, I first think a powerful group is ignoring ordinary people.

YOUTH QUESTION BANK

Youth Full 42 / items 1-4

Candidate v1 parallel form. Adult IDs and scoring coordinates are preserved; wording equivalence must be tested.

01	PUBLIC PROVISION / THINK
A Government should make sure everyone can get essential services such as healthcare and education.	B Government should have a smaller role, with people using more private choices for essential services.
02	PUBLIC PROVISION / FEEL
A I worry more when people may miss essential services because they cannot afford private options.	B I worry more when government control of essential services reduces choice and independence.
03	PUBLIC PROVISION / ACT
A I would vote for government taking more responsibility to guarantee essential services.	B I would vote for a smaller government role and more private responsibility for essential services.
04	REDISTRIBUTION / THINK
A Government should use taxes and support payments to reduce very large income gaps.	B Government should interfere less with income differences, even when some gaps become very large.

YOUTH QUESTION BANK

Youth Full 42 / items 5-8

Candidate v1 parallel form. Adult IDs and scoring coordinates are preserved; wording equivalence must be tested.

05	REDISTRIBUTION / FEEL
A Very large income gaps concern me more than the higher taxes used to reduce them.	B Higher taxes concern me more than very large income gaps.
06	REDISTRIBUTION / ACT
A I would support moderately higher taxes, including for me later, if they reduced very large income gaps.	B I would choose lower taxes even if very large income gaps remained.
07	OWNERSHIP / THINK
A Workers, cooperatives or the public should own a larger share of big companies.	B Big companies should normally remain mainly owned by private investors, with rules protecting workers.
08	OWNERSHIP / FEEL
A It feels fairer when workers, cooperatives or the public own more of big companies.	B It feels fairer when private investors keep most ownership, while laws protect workers.

YOUTH QUESTION BANK

Youth Full 42 / items 9-12

Candidate v1 parallel form. Adult IDs and scoring coordinates are preserved; wording equivalence must be tested.

09	OWNERSHIP / ACT
A I would support policies that move more big-company ownership to workers, cooperatives or public funds.	B I would keep most big-company ownership with private investors.
10	SOCIAL CHANGE / THINK
A Public rules should change fairly soon when a new social norm gains strong support.	B Long-standing rules should change only after a new social norm has broad and lasting support.
11	SOCIAL CHANGE / FEEL
A I feel more uneasy when public rules fall behind a widely supported social change.	B I feel more uneasy when long-standing rules change before society broadly accepts the change.
12	SOCIAL CHANGE / ACT
A I would usually update an old rule once a new norm had strong, although not overwhelming, support.	B I would usually keep the old rule until support for change was broad and lasting.

YOUTH QUESTION BANK

Youth Full 42 / items 13-16

Candidate v1 parallel form. Adult IDs and scoring coordinates are preserved; wording equivalence must be tested.

13	PERSONAL AUTONOMY / THINK
A Adults should normally be free to make private choices that do not directly harm other people.	B Law may restrict some private adult choices to protect shared moral standards, even without direct harm.
14	PERSONAL AUTONOMY / FEEL
A I am more uncomfortable when government restricts harmless private choices between adults.	B I am more uncomfortable when law gives no weight to shared moral standards.
15	PERSONAL AUTONOMY / ACT
A Even if I strongly disliked a private adult choice, I would oppose banning it when it harmed nobody else.	B I could support banning a private adult choice if I believed it seriously damaged shared moral standards.
16	ABORTION / THINK
A Abortion should generally remain legal because the pregnant person should make the main decision.	B Abortion should face stronger legal limits because prenatal life should receive greater protection.

YOUTH QUESTION BANK

Youth Full 42 / items 17-20

Candidate v1 parallel form. Adult IDs and scoring coordinates are preserved; wording equivalence must be tested.

17	ABORTION / FEEL
A I am more concerned about taking the decision away from the pregnant person.	B I am more concerned about not protecting prenatal life.
18	ABORTION / ACT
A I would vote for broader legal access to abortion.	B I would vote for stronger legal limits on abortion.
19	AUTHORITY ORDER / THINK
A Government should restrict freedom only when it can show a clear and serious risk of harm.	B Government may restrict some freedoms early when there is a believable risk of serious disorder.
20	AUTHORITY ORDER / FEEL
A During a crisis, I worry more about government using too much power.	B During a crisis, I worry more about authorities lacking enough power to restore safety.

YOUTH QUESTION BANK

Youth Full 42 / items 21-24

Candidate v1 parallel form. Adult IDs and scoring coordinates are preserved; wording equivalence must be tested.

21	AUTHORITY ORDER / ACT
A During serious disorder, I would keep strong legal safeguards even if action became slower.	B During serious disorder, I would allow wider temporary powers even if some safeguards were reduced.
22	PLURALISM / THINK
A Winning an election should not remove checks from courts, laws, opposition parties and independent media.	B An elected government should have wide freedom to carry out its programme even when other institutions block it.
23	PLURALISM / FEEL
A I am more alarmed when an elected majority weakens independent checks on its power.	B I am more alarmed when unelected institutions repeatedly block an elected government.
24	PLURALISM / ACT
A I would defend independent checks even when they slowed a government I strongly supported.	B I could support reducing those checks if they repeatedly blocked the elected programme.

YOUTH QUESTION BANK

Youth Full 42 / items 25-28

Candidate v1 parallel form. Adult IDs and scoring coordinates are preserved; wording equivalence must be tested.

25	WORLD SOVEREIGNTY / THINK
A Countries should accept binding international rules when shared problems cannot be solved alone.	B Countries should keep the final national decision even when cooperation becomes less effective.
26	WORLD SOVEREIGNTY / FEEL
A I feel more uneasy when shared problems remain unsolved because countries refuse binding agreements.	B I feel more uneasy when international agreements limit my country's final say.
27	WORLD SOVEREIGNTY / ACT
A I would support a necessary international agreement even if it limited some national choices.	B I would keep national control even if the international response became less effective.
28	NATIONHOOD MEMBERSHIP / THINK
A A naturalised citizen can belong to the nation just as fully as someone who was a citizen from birth.	B Being a citizen from birth should carry extra weight in deciding who fully belongs to the nation.

YOUTH QUESTION BANK

Youth Full 42 / items 29-32

Candidate v1 parallel form. Adult IDs and scoring coordinates are preserved; wording equivalence must be tested.

29	NATIONHOOD MEMBERSHIP / FEEL
A A naturalised citizen who takes part in the country's life feels just as fully part of the nation to me.	B A citizen from birth feels more fully part of the nation to me than a naturalised citizen.
30	NATIONHOOD MEMBERSHIP / ACT
A I would not prefer one equally suitable candidate only because they were a citizen from birth.	B I would prefer the citizen from birth over an equally suitable naturalised citizen.
31	POPULISM / THINK
A Political disagreements usually involve several real interests and values, not only ordinary people against an elite.	B Politics is often ordinary people against a self-serving elite that ignores their common interests.
32	POPULISM / FEEL
A When politics fails, I am more likely to think difficult trade-offs and competing interests are responsible.	B When politics fails, I am more likely to blame a self-serving elite that ignores ordinary people.

YOUTH QUESTION BANK

Youth Full 42 / items 33-36

Candidate v1 parallel form. Adult IDs and scoring coordinates are preserved; wording equivalence must be tested.

33	POPULISM / ACT
A I would prefer a candidate who says political problems cannot usually be reduced to people versus elite.	B I would prefer a candidate promising to take power back from an elite and carry out the people's common will.
34	ECOLOGY GROWTH / THINK
A Environmental limits should sometimes come before economic growth, even if growth becomes slower.	B Economic growth should normally come first, while environmental harm is reduced without deliberately slowing growth.
35	ECOLOGY GROWTH / FEEL
A I worry more about environmental damage when growth is given priority.	B I worry more about jobs and living standards when environmental limits are given priority.
36	ECOLOGY GROWTH / ACT
A I would support firm environmental limits even if they moderately slowed economic growth.	B I would reject limits designed to slow growth and choose environmental policies that protect growth.

YOUTH QUESTION BANK

Youth Full 42 / items 37-40

Candidate v1 parallel form. Adult IDs and scoring coordinates are preserved; wording equivalence must be tested.

37	RELIGION PUBLIC ROLE / THINK
A Religious principles should not be used as reasons for laws applying to people who do not share that religion.	B Religious principles can be legitimate reasons for laws even when some citizens do not share the religion.
38	RELIGION PUBLIC ROLE / FEEL
A I feel more uneasy when religious principles are used to justify laws for everyone.	B I feel more uneasy when religious views are dismissed from public debate simply because they are religious.
39	RELIGION PUBLIC ROLE / ACT
A I would prefer politicians not to use religious principles as reasons for laws applying to everyone.	B I would accept politicians using religious principles as legitimate reasons for laws applying to everyone.
40	SUBSIDIARITY / THINK
A Higher-level government should handle important services when that best guarantees equal access and standards.	B Important services should stay with the lowest level able to manage them, such as local communities.

YOUTH QUESTION BANK

Youth Full 42 / items 41-42

Candidate v1 parallel form. Adult IDs and scoring coordinates are preserved; wording equivalence must be tested.

41	SUBSIDIARITY / FEEL
A I feel more comfortable when higher government guarantees the same standards for everyone.	B I feel more comfortable when capable families, communities or local institutions keep responsibility.

42	SUBSIDIARITY / ACT
A If both approaches could work, I would choose higher government to guarantee consistent standards.	B If both approaches could work, I would keep responsibility at the lowest capable level.

06 Validate

Engineering checks protect structure. Only cognitive interviews, accessibility testing and empirical comparison can establish whether the forms work for intended students.

Use the section tabs and page numbers to jump directly to the classroom material you need.

PILOT EVIDENCE

What must be tested before launch

1	Comprehension	Ask students to explain each side in their own words.
2	Neutrality	Check whether one side sounds kinder, smarter or more socially acceptable.
3	Reading load	Record skipped words, rereading, completion time and requests for help.
4	Construct match	Confirm that simpler wording still measures the intended trade-off.
5	Response behaviour	Review unsure, missing and extreme-response patterns by age.
6	Equivalence	Compare Youth candidate results with the adult form using an appropriate study design.
7	Accessibility	Test keyboard, screen reader, contrast, zoom, motion and mobile use.
8	Teacher usability	Observe setup, pacing, projector reveal and debrief without coaching.
9	Legal + privacy	Qualified review of lawful basis, notices, minimisation, retention, vendors and rights.

Boundary: passing automated tests does not establish psychometric validity, age suitability or legal authorization.

TEACHER CHECKLIST

Before, during and after

Print this page or keep it beside the teacher dashboard.

BEFORE CLASS	DURING CLASS	AFTER CLASS
☐ Select the age band deliberately. ☐ Check the goal and sensitive content. ☐ Choose live or delayed reveal. ☐ Prepare a non-digital alternative. ☐ Explain anonymity and discussion rules.	☐ Watch totals, not individuals. ☐ Ask for reasons without asking who chose. ☐ Show both sides fairly. ☐ Pause when discussion becomes personal. ☐ Separate preference from literacy.	☐ Close the room. ☐ Use aggregate reporting only. ☐ Record concepts needing follow-up. ☐ Follow approved retention or deletion. ☐ Report safeguarding or privacy incidents.

REQUIRES QUALIFIED LEGAL REVIEW

The aggregate-only design reduces risk. It does not remove duties relating to minors, political-opinion processing, safeguarding, accessibility or school authorization.
